

# CMSC 104

Problem Solving and  
Computer Programming  
Fall 2012

Instructor: John Park

Sections 03, 04, & 05

---

---

---

---

---

---

---

## First Things First...

**Welcome!!!**

(Especially new students!)

---

---

---

---

---

---

---

## Instructor—Personal Information

- Who am I?
  - My name is John Park
  - New full-time lecturer in the CSEE Dept.  
(Don't worry: I've taught part-time at UMBC for years)
  - Most recently:
    - Researcher at U. of Md. Institute for Advanced Computer Studies (UMIACS)
    - Bioinformatics/computer science consultant

---

---

---

---

---

---

---

## Instructor—Personal Information

- I'm interested in most areas of computation
- Previously worked (longer than I'd care to say ☺) in many areas of computer science, including operating systems, artificial intelligence, biomedical informatics, and image processing
- Have spent significant time in both industry and academia
- One of my goals is to bring an applied, real-world perspective to a broad range of courses in the department

---

---

---

---

---

---

---

---

## Instructor—Personal Information

- Why did I switch to teaching?
  - Maximize leveraging: teach lots of new doers
  - I want my phone to work!

---

---

---

---

---

---

---

---

## Contact Information

- Best way to contact me?
  - Email! [park@umbc.edu](mailto:park@umbc.edu)
  - I will try for a 24-hour turnaround time, but please, no last-minute requests!
- Office hours:
  - Where? ITE 207
  - When?
    - Mon/Wed: 11am-noon
    - Tues/Thurs: 2:30pm-3:30pm
    - Available other times by appointment; I'm very open to meeting with students, so do take advantage of that!

---

---

---

---

---

---

---

---

## Apologies

- We (the CSEE Dept.) are confronting a resurgence of interest in the field
- Most of the undergraduate course offerings (and graduate, actually) are oversubscribed
- Long term: Good
- Short term: Bad

---

---

---

---

---

---

---

---

## Am I in the Right Class?

- CMSC 104
  - Assumes NO programming experience
  - Introduces students to basic programming concepts like if/then structures and loops
  - Prepares you for CMSC 201
  - Does NOT count directly towards the CS major
  - Meets a requirement for other majors: i.e. Physics, Financial Economics

8

---

---

---

---

---

---

---

---

## Am I in the Right Class?

- Advanced alternative: CMSC 201
  - Assumes some programming experience
  - First CMSC course for CS majors
  - Presumes you have basic grasp of thinking procedurally
    - E.g.: computer loops won't "throw you for a loop"
  - Focuses on more complex issues like proper design
  - Much more challenging

9

---

---

---

---

---

---

---

---

## CS Minor Requirements

- Total of 23 credits (7 classes)
- Required courses:
  - CMSC 201 – Comp. Sci. I for Majors
  - CMSC 202 – Comp. Sci. II for Majors
  - CMSC 341 – Data Structures
  - CMSC 203 – Discrete Structures (can use MATH 301 instead)

10

---

---

---

---

---

---

---

---

## CS Minor Requirements cont.

- Elective courses (9 credits):
    - 1 – 3 courses chosen from CMSC4xx
    - 0 – 2 courses chosen from:
      - CMSC 313 – Computer Org & Assembly
      - CMSC 331 – Principles of Programming Languages
      - MATH 221 – Linear Algebra
- (Note that this might change)

11

---

---

---

---

---

---

---

---

## CS Game Development Track

- Web site: [gaim.umbc.edu](http://gaim.umbc.edu)
- Not a separate degree just a “track” within the regular CS B.S. program
- Must complete all regular CS B.S. requirements plus some additional required and elective courses both in and outside the department (for example: “ART 380: History and Theory of Games”)

12

---

---

---

---

---

---

---

---

## What Will We Learn?

1. General computer hardware and software concepts
2. Basic computer use
3. Problem solving
4. Basic computer programming in the "C" programming language

13

---

---

---

---

---

---

---

---

## 1. General Hardware and Software Concepts

- Introduction to computer architecture
- Data representation and memory usage
- Introduction to operating systems

14

---

---

---

---

---

---

---

---

## 2. Basic Computer Use

- Basic use of
  - an operating system (Linux -- new for most of you!)
  - a text editor (XEmacs)
  - a command-driven interface

15

---

---

---

---

---

---

---

---

### 3. Problem Solving

---

- Problem solving and algorithm development
  - general vs. specific solution to a problem
  - use of top-down design
  - use of pseudocode

16

---

---

---

---

---

---

---

---

### 4. Basic Computer Programming

---

- Creating and executing a computer program
- Testing and debugging a computer program
- C programming language basics

17

---

---

---

---

---

---

---

---

### Course Information

---

- On the Web:
  - <http://www.cs.umbc.edu/104>
- Follow links to Fall 2012 then "Mr. Park's Sections"
- Refer to the site regularly throughout the semester (e.g. Announcements on main page)
- We will also use Blackboard for discussions and other materials

18

---

---

---

---

---

---

---

---

## Computer Science at UMBC

- CSEE Student Services (Advising)
  - ITE 203 - 206
- CSHC (Computer Science Help Center)
  - ITE 201-E
- Linux Users Group (LUG)
  - <http://lug.umbc.edu>
- Computer Science Council of Majors (CSCM)

19

---

---

---

---

---

---

---

---

## Computer Labs

- The Division of Information Technology (DoIT) is responsible for all lab computers.
- On Web at:  
<http://my.umbc.edu/topics/computing-and-technology>
- Labs with PCs:
  - ENG021, ENG104, ENG122, ENG122A, ENG333
- Labs may be on reserve for classes, so plan ahead!
- Print Dispatch -- ENG 019 (10? cents/page)
- Hours of Operations
  - DoIT will post outside of labs

20

---

---

---

---

---

---

---

---

## DoIT Help Desk

- Located in ENG 020
- Phone: 410-455-3838
- Can help with a variety of things:
  - problems logging into your account
  - quota issues
  - communicating with UMBC computers (we'll discuss this in more detail later)
- Cannot help with course assignments

21

---

---

---

---

---

---

---

---

## Computer Science Help Center

- CSHC is staffed by student tutors
  - Tutors available on a first-come-first-served basis
- Can help with
  - Homework and projects
  - XEmacs and Linux questions
- Located in ITE 201-E
  - Hours TBA

22

---

---

---

---

---

---

---

---

## Hardware and Software Needs

- Do I need my own computer?
  - No, but it is more convenient for you.
- If I have my own computer do I need to install Linux?
  - No, you will be able to do your work in Windows (or on a Mac) as long as you have Internet access.

23

---

---

---

---

---

---

---

---

## Using Your Own Computer: SSH

- We will discuss this in much more detail in future classes. You do not have to download anything at this point!!
- Windows users will need a software communications program like TeraTerm
- Must be connected to the Internet to use
- You can download TeraTerm from DoIT:  
<http://my.umbc.edu/groups/doiit/pages/2>
- Consult DoIT for help

24

---

---

---

---

---

---

---

---

## Any Questions about Logistics?

---

---

---

---

---

---

---

---

---

## Special Experiment This Year: Introduction

---

- Presenting Prof. Susan Martin

---

---

---

---

---

---

---

---
